CAREER OBJECTIVE

- Applied strong attention to detail and technical expertise in civil engineering to software development increased codebase quality by 15% and reduced debugging time by 25% through meticulous code reviews and testing.
- Transitioned from civil engineering to software development, leveraging analytical skills and problem-solving abilities, enhanced team efficiency by 20% through the development of a bug-tracking system in Python and C#.

WORK EXPERIENCE

Junior Unity VR Developer

TECHNOCIL PVT LTD, Technopark, Trivandrum

Aug 2025 – Present

- Designed and developed VR applications using Unity 3D and C#, focusing on training, simulations, and immersive environments.
- Contributed to a confidential client project (under NDA) for a UAE government entity, ensuring high-quality VR solutions while maintaining strict confidentiality.
- Implemented VR mechanics, physics-based interactions, and immersive UI/UX for training modules.
- Applied Integrated VR SDKs (Oculus, OpenXR) for interactive and realistic experiences.
- Collaborated with international teams and enterprise-level clients, adhering to secure workflows and project standards.
- Optimized rendering performance to achieve low latency and smooth VR experiences.

Key Projects:

Confidential UAE Government Project (NDA Signed):

Contributed to the development of immersive VR training modules.

Focused on user interaction systems, 3D asset integration, and performance optimization.

VR Training & Simulation Applications:

Built VR-based applications tailored for industrial and training use cases.

Designed interactive workflows, collision handling, and real-time simulations.

Unity VR Developer Trainee

TECHNOCIL PVT LTD, Technopark, Trivandrum

Mar 2025 – Aug 2025

- Gained hands-on experience in Unity 3D and C# scripting for VR/AR and 2D/3D game development.
- Designed and implemented game mechanics, UI elements, and physics-based interactions.
- Collaborated in debugging, optimizing performance, and ensuring smooth gameplay across devices.
- Applied OOP concepts, asset management, and version control (Git) to maintain clean and reusable code.
- Explored VR frameworks and contributed to creating immersive interactive experiences

Python Fullstack Developer Trainee

CB Tech, Kadavanthra, Kochi

Jun 2024 – Nov 2024

- Executed full-cycle development of more than 2 responsive websites through effective use of the Django framework; incorporated best practices for database management which resulted in seamless data integration across platforms.
- Administered comprehensive MySQL databases that streamlined data management tasks, resulting in a reduction of manual entry errors by over 50% while improving overall system reliability during peak usage periods.
- Designed and developed responsive, visually appealing user interfaces using JavaScript, CSS and Bootstrap.
- Led full-cycle web development, from ideation to deployment, ensuring seamless functionality and user experience
- Deployed web applications on PythonAnywhere, gaining practical experience in cloud-based hosting.

PROJECTS

PYTHON-DJANGO (Ecommerce website)

Project: E-commerce Shopping Website

Role: Full Stack Developer

- Developed a full-featured eCommerce shopping platform using Python Django, enabling secure product browsing, and order processing for a small business looking to expand online.
- Designed and implemented CRUD operations for managing products, user profiles and orders using Python Django.
- Developed the frontend using HTML and CSS for a responsive, user-friendly shopping experience.
- Implemented security best practices such as password hashing, session management, and CSRF protection to safeguard user data.

Project: Hospital Management Website

Role: Full Stack Developer

- Developed a hospital appointment scheduling system using Python Django, enabling patients to book appointments with doctors and receive email notifications.
- Frontend developed by using HTML and CSS for a responsive, user-friendly appointment booking interface, it will increase online bookings.
- Deployed using PythonAnywhere and integrated with SMTP for email notifications.

CERTIFICATIONS

- Unity VR Developer Training Certification - TECHNOCIL PVT LTD
- PYTHON FULLSTACK - CB Tech, Kochi
- TechA Python Developer Certification - INFOSYS Springboard
- Data Structures & Algorithms in Python - INFOSYS Springboard

TECHNICAL SKILLS

Programming Languages	• C# • C • Python
Framework	• Django
Database	• SQL

Tools & Technologies	• Github • VS Code & PyCharm
Web Development	• HTML • CSS • JavaScript • Bootstrap • JQuery
Game & XR Development	• Unity 3D, VR SDKs (Oculus, HTC Vive, OpenXR), VR UI/UX, 3D Asset Integration, Game Physics, Performance Optimization, Git & Version Control

EDUCATION

BTECH	7.24/10	2018-2022
Civil Engineering	CGPA	
Kerala Technical University		
PLUS TWO Science	88/100%	2016-2018
Kerala State Board of Exam		

ADDITIONAL SKILLS

- Project management skills
- Effective communication skills demonstrated during client consultations
- Analytical and Problem- solving skills
